

Water balance component	Sources of water		Distribution of water		% of volume measured
	Volume (ML)	% of total	Volume (ML)	% of total	
Storage volume					
Volume in storage at start of year					
Volume in storage at end of year					
Change in storage					100%
Storage net evaporation					100%
Inflows					
Storage inflows					100%
Downstream tributaries (1)					100%
Subtotal					100%
Net Water diverted under water rights					
Domestic and stock rights (2)					0%
Native title rights (2)					0%
Subtotal					0%
Net Water diverted under access licences					
Domestic and stock					100%
High security					100%
General security					100%
Local water utility					100%
Major water utility					100%
Supplementary water					100%
Conveyance					100%
Subtotal					100%
Environmental water					
Net diversions to wetlands					100%
End of system flows					100%
Subtotal					100%
Other outflows					100%
Unaccounted difference (3)					99%
TOTAL					99%

Notes

THIS WATER BALANCE IS NOT YET COMPLETE

(1) Downstream tributaries include gauged flows

(2) Water rights are not metered. Values presented are estimated from recommended values provided in the Water Sharing Plan.

(3) Unaccounted difference is estimated as the difference between inflows, outflows and change in storage. This includes river evaporation, seepage, overbank flows, theft and any measurement errors recording other components.
